

GCS Integrated Showcase Evidence

One public constraint scene carries solve intent through decomposition, numeric evidence, gluing diagnostics, viewer projection, CLI smoke, and typed rejection evidence.

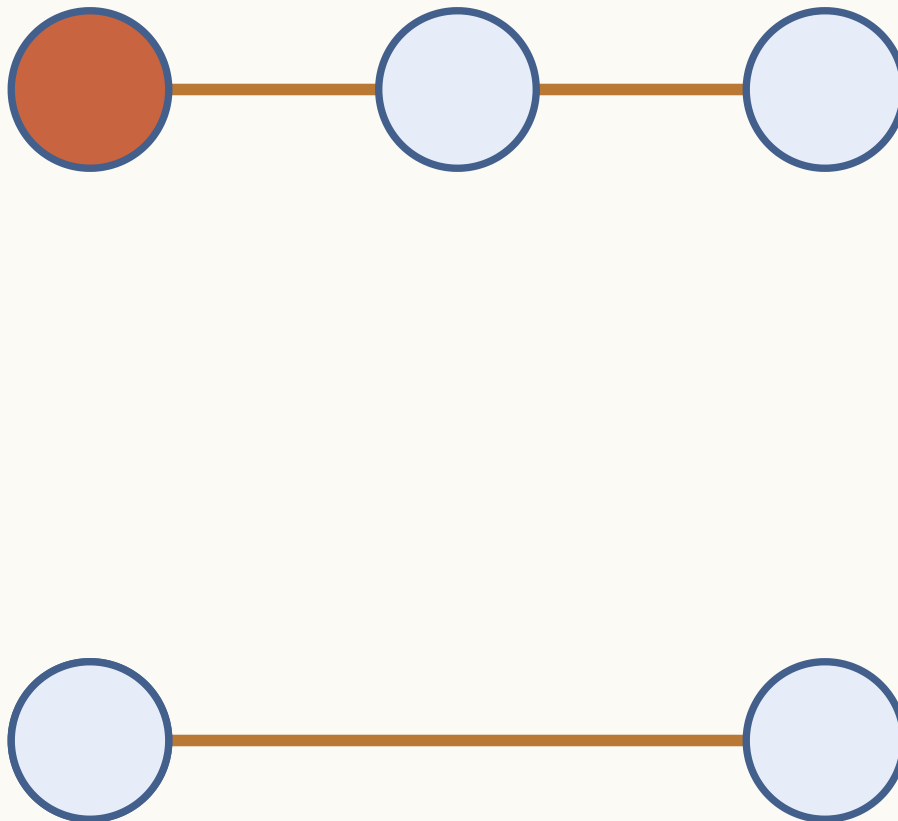

AcceptedWithWarnings

evidence.domain

Scene Contract

Scene Contract

Public JSON carries durable solve intent and inspectable geometry.

Rigid sets

Fixed IDs

1

evidence.graph

Constraint Graph

Constraint Graph

Two local components make the showcase a real decomposition scene.

Components: (0, 1, 2); (3, 4, 5)

Constraints: Distance, Distance, Distance, Perpendicular

Geometry mix: Point, Point, Point, Point, Plane, Line

evidence.planner

Boundary Plan

Boundary Plan

Fixed geometry propagates into cover and local numeric tasks.

planner subproblems

2

cover contexts

3

evidence.numeric

Numeric Evidence

Numeric Evidence

Rank and residual reports stay visible at the local-solve boundary.

local 0

rank 2, free 6, frozen 3, residual max 0.0

local 1

rank 2, free 15, frozen 0, residual max 0.0

evidence.diagnostic

Gluings Diagnostics

Gluings Diagnostics

Local sections become a committed accepted state through diagnostics.

gluing.accepted

All local sections are compatible within boundary tolerance.

post-local diagnostics warnings: 2

evidence.failure

Negative Variant

Negative Variant

Invalid solve intent fails with a stable typed report code.

kernel.solve_intent_missing_fixed_entity

missing fixed geometry IDs: [999]

evidence.boundary

Gate Chain

Gate Chain

The showcase is public evidence because fixture, viewer, replay, and CLI gates name it.
